

**University of St Andrews**  
**School of Chemistry**  
**EaStCHEM Hirst Academic Fellow – CD7935**  
**Salary: £36,862 - £45,336 per annum**

An EaStCHEM Advanced Academic Fellowship in Inorganic Chemistry to be held at the University of St Andrews is now available. Hirst fellowships are part of the ongoing integration of research in the EaStCHEM, are for five years in the first instance and allow exceptional scientists to establish independent research careers. This fellowship will have generous start-up funds and studentships associated with it. As was this case for previous appointments a successful Fellow will be considered for a full time academic position at an appropriate moment.

We will consider applicants who can contribute to and complement our current research and teaching in inorganic chemistry with particular interests in transition metal chemistry and biological inorganic chemistry. You will have an outstanding track record in your particular field. Current holders of URF, Wellcome or other fellowships are also encouraged to apply for this position. You should submit a CV and a Research Proposal.

Informal enquiries concerning Fellowships can be made to Professor Derek Woollins ([jdw3@st-andrews.ac.uk](mailto:jdw3@st-andrews.ac.uk)).

**Closing Date: 5 April 2011**

We encourage applicants to apply online, however if you are unable to do this, please call +44 (0)1334 462571 for an application pack.

**Please quote ref: CD7935**

The University is committed to equality of opportunity.
